TITLE
Global CBIT Platform phase II: A unified support platform and program for article 13 of Paris Agreement

OBJECTIVE
To provide global streamlined support, capacity building and coordination to help developing countries meet enhanced transparency requirements under article 13 of Paris Agreement

GEF PROJECT DETAILS
See in GEF website

STATUS
Concept approved

CONCEPT APPROVAL
31 October 2018

PROJECT DOCUMENT APPROVAL
Pending

IMPLEMENTING AGENCIES
United Nations Environment Programme
United Nations Development Programme

EXECUTING AGENCIES
UNEP DTU Partnership

PROJECT OUTCOMES
Developing countries increasingly access information and knowledge in support of article 13 of Paris Agreement

Developing countries can document and share progress, support needed and received, and good practice on article 13 implementation, including gender mainstreaming

STAKEHOLDERS
UN Environment
United Nations Development Programme
UNEP DTU Partnership
Food and Agriculture Organization of the United Nations
Conservation International
Other GEF implementing agencies
Partnership on Transparency in the Paris Agreement
International Partnership on Mitigation and MRV
Countries with CBIT projects
Development partners
UNFCCC
UNFCCC Parties

KNOWLEDGE MANAGEMENT APPROACHES
Capture and share knowledge from country-level projects and other transparency-related initiatives

Develop a long-term data management plan

Generating knowledge products
Maintaining the content in the platform

Provide support for South-South exchanges

Increase knowledge accessibility by distributing information from regional workshops to other regions, and translating materials into multiple languages

MEET THE FOCAL POINT OF THE PROJECT
Frederik Staun
10 years of increasing responsibility at UNEP DTU Partnership working across a range of climate change issues (GHG inventories, MRV, mitigation, finance) including 3 years with UNDP in Uganda and New York. In-depth understanding of national sustainable development challenges gained from working with senior government officials in more than 30 developing countries.

I am very excited about coordinating the CBIT Global Coordination Platform as it presents the essence of what I believe are the strongest mechanisms for capacity development: peer-to-peer learning, south-south cooperation and knowledge sharing.

CBIT is supporting countries to respond to article 13 of the Paris Agreement and the national CBIT projects provide an opportunity for countries to build capacity to institutionalize mechanisms to report on progress of NDC implementation. In this process, the platform is expected to provide information about all national CBIT project and create linkages for peer learning.

Please feel free to reach out for any enquiries or ideas on how to improve the platform.
PROGRESS
