**PROJECT DETAILS**

**GUATEMALA**
Central America

**TITLE**
Strengthening Guatemala's transparency framework through capacity building to implement the Paris Agreement

**OBJECTIVE**
Establishing and implementing a MRV system in Guatemala to monitor the implementation of its NDC and to meet the requirements defined under the Article 13 of the Paris Agreement

**GEF PROJECT DETAILS**
See in GEF website

**PROJECT OUTCOMES**
A MRV system to improve the calculation of the GHG inventories is designed and implemented.
A system to monitor the NDC mitigation component is designed and implemented.
A system to monitor the NDC adaptation component is designed and implemented.
 Capacities to monitor support provided and received are improved.
Climate change sectoral commissions integrate the MRV component.

**STAKEHOLDERS**
Ministry of Environment and Natural Resources (MARN)
National Forest Institute (INAB)
National Coordination for Disaster Reduction (CONRED)
Institute of Seismology, Volcanology, Meteorology, and Hydrology (INSIVUMEH)
National Council for Protected Areas (CONAP)
National Statistics Institute (INE)
Ministry of Agriculture, Livestock, and Food (MAGA)
Presidency Secretariat of Planning and Programming (SEGEPLAN)
Ministry of Public Health and Social Welfare (MSPAS)
Ministry of Energy and Mines (MEM)
Ministry of Public Finance (MINFIN)
Ministry of Economy (MINECO)
Superintendence of Tax Administration (SAT)
Central Bank (BANGUAT)
United Nations Development Programme (UNDP)
Private Sector
Academic Sector
Representatives of indigenous and peasant authorities and organizations

**KNOWLEDGE MANAGEMENT APPROACHES**
Specific output on knowledge management (output 1.5.4: Knowledge management to support the implementation of the domestic MRV system is enhanced)
Participation in the CBIT Global Coordination Platform

**MEET THE FOCAL POINT OF THE PROJECT**
David Barrera
### PROGRESS

> to be provided by the country focal point <

### STATUS OF PROJECT OUTPUTS AND ACTIVITIES

#### 1.1 A MRV system to improve the calculation of the GHG inventories is designed and implemented

| 1.1.1 Capacities in the public and academic sectors to implement the 2006 IPCC Guidelines for calculating Greenhouse Gases (GHG) inventories are improved | > to be provided upon approval of project document < | 0% |
| 1.1.2 Inventory data collection and exchange methodology including gender-disaggregated information amongst different sectors is designed and implemented | > to be provided upon approval of project document < | 0% |
| 1.1.3 Quality Assurance (QA) and Quality Control (QC) methodology, and uncertainty analysis are designed and implemented | > to be provided upon approval of project document < | 0% |
| 1.1.4 Gap analysis in activity data are developed and improved in at least two sectors | > to be provided upon approval of project document < | 0% |
| 1.1.5 Information Technology (IT) system to storing and sharing with gender-disaggregated data under the framework of the National Climate Change Information System (SNICC) is established | > to be provided upon approval of project document < | 0% |

#### 1.2 A system to monitor the NDC mitigation component is designed and implemented

| 1.2.1 Metrics, indicators and methodologies for monitoring the NDC mitigation component are designed and validated | > to be provided upon approval of project document < | 0% |
| 1.2.2 Methodologies for assessing and reporting mitigation actions in NDC is implemented in at least two sectors | > to be provided upon approval of project document < | 0% |
| 1.2.3 Capacities in the public and academic sectors for monitoring and evaluation of mitigation actions are strengthened in two different prioritised sectors | > to be provided upon approval of project document < | 0% |

#### 1.3 A system to monitor the NDC adaptation component is designed and implemented

| 1.3.1 Metrics, indicators and methodologies for monitoring the NDC adaptation component are validated | > to be provided upon approval of project document < | 0% |
| 1.3.2 Base lines, metrics and indicators of adaptation actions are implemented in at least two sectors | > to be provided upon approval of project document < | 0% |
| 1.3.3 Capacities in the public and academic sectors with gender-sensitive perspective for monitoring and evaluation | > to be provided upon approval of project document < | 0% |
### 1.4 Capacities to monitor support provided and received are improved

<table>
<thead>
<tr>
<th>Subsection</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.4.1 Assessment of needs, constraints and gaps on climate finance at domestic and international level are developed</td>
<td>&gt;to be provided upon approval of project document&lt; 0%</td>
</tr>
<tr>
<td>1.4.2 Methodologies to strengthening use and availability of climate finance data are developed and implemented</td>
<td>&gt;to be provided upon approval of project document&lt; 0%</td>
</tr>
<tr>
<td>1.4.3 Capacities for climate finance data reporting in the public and private sectors, and international cooperation are improved</td>
<td>&gt;to be provided upon approval of project document&lt; 0%</td>
</tr>
</tbody>
