

# Capacity-building program to comply with the Paris Agreement and implement its transparency requirements at the national level

## Monitoring and reporting of support needed and received in the framework of CBIT

**April 25-26. 2018**

**Berlin, Germany**

GLOBAL SUPPORT PROGRAMME

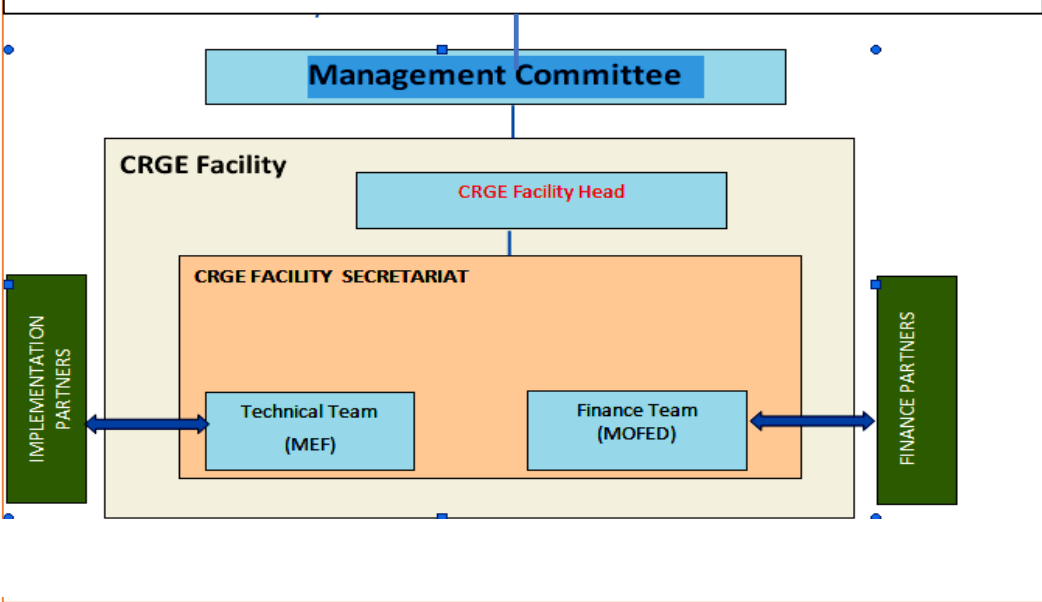

## Existing status on M&E of support needed and received

**CBTI - Major outcomes of COP 22, Marrakech; based on Article 13 of Paris Agreement, followed by countries submission.**

### Inter-Ministrial Committee, Chaired by PM office

- Over seen by the inter-ministerial
- Support needed and received and the status of implementation has been presented to the management committee for approval.
- Implementing partners are monitored by legislatives
- Support needed are conveyed to the legislative body
- National Communication and others.
- CRGE Facility M&E system manual (Under revision )

# Ethiopia's Capacity Building Initiative Transparency

GLOBAL SUPPORT PROGRAMME

➤ High-level leadership and planning support instituted.

➤ Clearly defined roles and tasks of stakeholders for the implementation of the transparency requirements.

➤ National system for GHG emission inventory, and functional GHG database and information system established.

## Institutional capacity development.

➤ Guidelines on the formulation of GHG mitigation policy measures

➤ **Methods to quantify and integrate support needd and report on effective utilization of the support received**

➤ Conversant experts on the transparency framework

➤ Data collection widened and improved to sustain the use of the 2006 IPCC Guidelines.

➤ Training on the use of 2006 IPCC Guidelines at relevant Ministries and universities.

➤ National universities engaged to support the Competent Authority in establishing QA/QC procedures and uncertainty analysis of the GHG inventory .

## Technical capacity development tools, training and assistance

Enhance institutional and technical capacity related to climate transparency in Ethiopia

# Ethiopia's CBIT proposal in regard to monitoring and reporting the support needed and received.

GLOBAL SUPPORT PROGRAMME

## Conventionally

Monitoring of support needed and received – Managed as per the previous approach.

Reporting support needed – We tried out to reach different development partners.

Reporting the support received - Only to the support providers.

By using this as a base we plan to develop methods to quantify and integrate support needed and report on effective utilization of the support received and build transparency. To achieve this capacity will be build to:

Integrate support needs for building a climate resilient net- zero emitting economy into the national budget management system

Track and report on effective utilization of the support received.

quantify support needs for building resilience to climate change and report.

# Conclusion

GLOBAL SUPPORT PROGRAMME

Support provide to meet the transparency of support requirements of my countries will be significant to:

Strengthen the existing national approach

Will advance the support we received

Comply with the Paris agreement and its respective article.

Build trust on the contributing parties, organizations and others

Thank you
