PARTNERSHIP

CBIT Global Coordination

- The platform will enable coordination, maximize learning opportunities, and enable knowledge sharing to facilitate transparency enhancements.
- The platform will engage countries, the GEF Partner Agencies, and other relevant entities and institutions with related programming activities to enhance partnership of national, multilateral, and bilaterally supported capacity-building initiatives

(CBIT Programming Directions)

Project Components

1. **CBIT Platform for coordination, learning opportunities, and knowledge sharing**
 - Lead UN Environment (UNEP DTU Partnership)
2. **Coordination and exchange events**
 - Lead UNDP
 - Kick-off and first technical workshop 18-20 April 2017, Copenhagen
 - Second technical workshop 24-26 April 2018, Berlin
 - Third technical workshop
3. **CBIT needs and gaps**
 - Lead UNDP
 - Baseline assessment of global needs and gaps
 - Roadmap for phase 2 to expand CBIT coordination platform

WHAT'S NEW?

Guide for peer review of national GHG inventories

Developing a national GHG inventory requires robust institutional arrangements, quality inputs (data, emission factors), understanding of the appropriate calculation...

[DETAILED INFORMATION](#)

CBIT support is very timely to continue inter-institutional processes key to climate change in Uruguay

Despite the international commitments, for Uruguay it's very important to develop a monitoring and verification system for domestic purposes because there is the commitment to account and to show the ministries involved in the NDC process how the country is tracking the progress of the measures and targets established in the NDC.

TITLE

Capacity building for Peru's transparency system for climate change mitigation and adaptation

OBJECTIVE

Develop Peru's institutional and human capacities to meet reporting requirements of the enhanced transparency framework of the Paris Agreement

STATUS:

Concept approved

CONCEPT APPROVAL:

25 September 2017

PROJECT DOCUMENT APPROVAL:

Pending

START DATE:

Pending

END DATE:

IMPLEMENTING AGENCIES:

UN Environment

EXECUTING AGENCIES:

Ministry of Environment of Peru

PROJECT OUTCOMES

Institutional and technical capacities for the formulation and use of sectoral long-term low greenhouse gas emissions development strategies are developed.

Institutional arrangements and technical capacities to systematize information for the implementation of the adaptation component of the NDC are established.

Institutional capacity for quantifying and reporting national public and private investments for the implementation of Peru's NDC is strengthened.

KNOWLEDGE MANAGEMENT APPROACHES

Making capacity building material that arises from this project available to the wider public

Regular updates on project work will be given to all involved public institutions

Participate in the CBIT global coordination platform and other relevant platforms and networks, providing and receiving inputs

You have this great example of Red INGEI in peer-to-peer learning, what are your expectations for the CBIT platform?

The expectation is that it will have things like case studies or examples from other countries that are dealing with identical problems as Uruguay. For example, the methodologies they are using to track mitigation measures or adaptation measures. I think that the global platform could be useful for that, if it can provide us other experiences or ideas to learn from. And perhaps also the opportunity to have a forum, for participants to exchange. I think it's important for the participants to know each other in order to facilitate the interaction and participation, because if you don't know the person it gets a bit difficult. Nevertheless, it will depend a lot on how these kind of dialogues will be stimulated and also on the persons working in each country. Perhaps 4 or 5 countries will use it more, and of course the language issue is important.
