Establishing Transparency Framework - Republic of Serbia -

*Danijela Bozanic, Head
Climate Change Department
Ministry for Environmental Protection*

NDC tracking in the framework of CBIT

NDC tracking in CBIT proposal

- Increase of importance of the issue;
- NDC based on sectoral PAMs;
- There is no obligation for monitoring of PAMs;
- Lack of knowledge of sectoral ministries;
- Implementation of the Law on Climate change;
- Fulfillment of international obligations;

- GHG Inventory development and maintaining by the SEPA – legally prescribed/improvement needed.

NDC tracking - mitigation

- Improvement of institutional/technical capacities for transparency of **mitigation and adaptation** in relevant sectors;
- Sustainable system for the assessment and tracking of the implementation of NDCs - capacities of competent institutions for development of projections and monitoring of PAM implementation;
- Guidelines for reporting financial, technology transfer and capacity-building support needed and received into the MRV system;
- E- tool for reporting:
 - on implementation/planning/continuous improvement of the NDCs sectoral activities;
 - of local communities/business sector on NDC related activities.

NDC tracking – adaptation

- Analytical approach to costs and benefits of the implementation of NDCs adaptation measures, and financing possibilities;
- E-tool for reporting on implementation/planning/continuous improvement of NDC adaptation measures and on occurrences of floods, extreme temperatures, droughts, and other extreme weather, as well as on their consequences.
- GHG Inventory improvement.
- Regional peer exchanges on NDC planning and implementation and on the enhanced transparency framework conducted.

CBIT will be instrumental for NDC tracking

- Assessment of the resources (financial and institutional) needed to implement NDC's specific mitigation policies and measures, with a gender-sensitive approach;
- Identification of needs and gaps of relevant institutions and local communities for reporting;
- Preparation of NDC tracking and reporting training programme, with gender sensitive approach;
- Development of protocol in regard to NDC revision on a continuous base;
- Development of relevant Guidelines.

THANK YOU FOR ATTENTION!
