

LECB / NDC Support Programme

*Empowered lives.
Resilient nations.*

Since 2011 to assist countries translate ambition into concrete national actions

- Initial focus on GHG inventory systems, NAMAs, LEDS, private sector in 25 countries, expanded to 38 in 2015 to support INDC design/implementation

17 regional & global NDC technical dialogues from 2014

- NDC process, lessons learned, including transparency issues
- Forum to exchange experiences and key technical / institutional issues

2015-2019 programme – INDC preparation → NDC Implementation Roadmaps in 22 countries.

- Whole-of-Government approach to manage the NDC
- NDC funding strategies and resource mobilization
- NDC Implementation Plans - specific actions in key sectors
- Data monitoring systems

Data management system central role for Paris implementation

- Essential to support long-term planning, but a system of trade-offs
- Benchmarking, recognize good practices, attract international finance
- Build on existing systems (NC/BUR, NAMAs, NAPs, CDM)
- Data gaps (variable quality, missing data / discontinuity, data sharing & confidentiality)
- Resources needed, institutional structures, coordination, mandates, incentives
