

CONSERVATION INTERNATIONAL SUPPORT TO COUNTRIES FOR TRANSPARENCY FRAMEWORKS

- **Technical support/capacity building to:**
 - Develop reference levels, improving information base, measuring emissions and tracking activities and results related to the land sector/REDD+ (ie MRV systems)
 - Transferring lessons from the land sector to other sectors for MRV (the land sector is more advanced because of the rigor of REDD+).
 - Stakeholder engagement and development of Safeguard Information Systems that cover both safeguards and Non-Carbon benefits
 - Build upon processes for mitigation MRV to promote the tracking and MRV of adaptation activities.
 - Develop implementation plans for any nature-based elements of NDCs (REDD+, EbA)
 - Design institutional structures and coordination mechanisms for implementation and tracking.
 - Design enabling policies and regulations for all of the technical activities listed above
- **Integrated monitoring systems/platforms and Advocacy around use of the Data/and Data Driven Policies**
